

**Question:** How do Fungi get nutrition?

- **Low response:**

- "Fungi can make their own food, like plants, by using photosynthesis to convert sunlight into energy."
- "Fungi have special structures called chloroplasts for photosynthesis to produce their own food."
- "Like green plants, fungi have chlorophyll to absorb sunlight and make nutrients."
- "Photosynthesis is part of what they do."

- **Medium response:**

- "Fungi get nutrition from live organic material."
- "Fungi obtain nutrients from dying inorganic material."
- "They eat bacteria."

- **High response:**

- "Fungi eat dead organic material and release energy into the environment."
- "They consume dead organisms."

**Question:** How do Fungi reproduce?

- **Low response:**

- "Fungi reproduce through binary fission, dividing into two identical halves."
- "They transfer spores through pollination, like plants."
- "Fungi do not reproduce asexually."
- "They don't reproduce."

- **Medium response:**

- "Pollination allows fungi to spread spores to new areas."
- "Binary fission is a way fungi divide to create new identical fungi."

- **High response:**

- "Fungi can reproduce asexually by using spores."
- "It's similar to pollen, but fungi produce spores."

**Question:** How can you graph a line?

- **Low response:**

- "With one intercept, you can figure out the entire line."
- "A single intercept is like a map to the line."
- "One point can help you draw the whole line."

- **Medium response:**

- "Knowing one intercept lets you draw the line from that starting point."

- **High response:**

- "Use slope and y-intercept."

- "The x- and y-intercepts determine the line."

**Question:** How would you tell how many squares are in the red border of a 3x3 shape?

- **Low response:**

- "Count one side and do the math; 3 squares on one side gives you 6 total squares."

- **Medium response:**

- "There are 3 rows and columns, so 3 times 3 equals 9 squares."

- **High response:**

- "Add the squares along each side, excluding corners."

**Question:** What could make the tanker car implode?

- **Low response:**

- "If the tanker is filled with a mix of water and soda, it might implode."

- **Medium response:**

- "Extreme hot weather could make the tanker car implode."

- **High response:**

- "A high pressure outside and low pressure inside could make it implode."
